

Life in the Fast Lane: Delivering the Unexpected

A special event for EMS providers.

What You Need To Know

One of the great things EMS providers get to do on occasion is bring a new life into the world.

If the thought of a patient in labor makes your palms sweat, you're not alone. Obstetrical calls can go very right or they can go very wrong.

You already know the stakes are high. When faced with an emergency delivery that does not go according to plan, will you be prepared?

Join OB-GYN **DR. SUSAN LITTLER** for a special night of OB education, including a **HANDS ON BIRTH SIMULATION TRAINING** session. Learn what you can do when conditions such as placenta previa, prolapsed cord, breech birth, and eclampsia complicate labor and delivery.

Wednesday September 27
6:00 pm - 8:00 pm

St. Johnsburg Fire Department
7165 Ward Road
North Tonawanda, NY 14120

Attendees will receive 2 contact education hours.

Complimentary free dinner provided.
Free parking available.

To register, call
(716) 447-6205.
