

Agenda

Community LOOW Project Public Meeting #3

6/13/2007
7:00 PM to 8:30 PM
Lewiston Senior Center

Meeting called by: **Scott King,**
Project Coordinator

Agenda topics

5	minutes	Welcome	Dan Stapleton
10		Project Update	Scott King
30		Preliminary review of radiologic issues	Marvin Resnikoff
30		Update on Community LOOW GIS progress	D. Amerlinck/L.McFail
15		Discussion	Scott King

Speakers

Daniel J. Stapleton is Public Health Director for Niagara County Department of Health
(716) 439-7435 Dan.Stapleton@niagaracounty.com

Scott King is the Project Coordinator. He is a consulting hydrogeologist with 24 years of experience in environmental site investigations. (716) 913-8950 scott@kinggroundwater.com.

Marvin Resnikoff, Ph.D. is an international consultant on radioactive waste issues. A nuclear physicist and a graduate of the University of Michigan, Dr. Resnikoff has worked on radioactive issues since his first project at West Valley, New York in 1978. Throughout his career, he has collaborated with public interest groups and local governments across the US in order to identify and create solutions for radioactive waste storage and transportation issues. (212) 620-0526 radwaste@rwma.com

Derek Amerlinck and **Lisa McFail** are GIS Specialists with Ecology & Environment, Inc. and are responsible for developing the Community LOOW GIS database and website. E&E are also developing the new county-wide GIS application for Niagara County. The E&E Project Manger for this work is Mr. Gregory Coniglio (716) 684-8060 gconiglio@ene.com

The Community LOOW Project

A unique collaboration of local, state and federal officials has funded a project that will evaluate the environmental status and create a GIS database of environmental data for the former Lake Ontario Ordnance Works site in Niagara County, NY. Data will include results of investigations, cleanups, and monitoring done by government and private industry at a former WWII era explosives plant and Manhattan Project storage site. The goal is to identify data gaps, ensure accountability, and increase trust in the community that this site is safe.

For more Information

If you wish to learn more about the Community LOOW Project you can do so at the project website. The address is www.niagaracounty.com/health. At this site, choose the heading “Hot Topics” and select Community LOOW Project. If you are not on our mailing and notification list, you can sign up at this meeting or contact Scott King 716-913-8950 or scott@kinggroundwater.com

The LOOW **Restoration Advisory Board** is a community-based volunteer group working as a liaison between the community and the government. Excellent information and opportunities for citizen involvement can be obtained at the RAB website <http://www.loowrab.org/index.htm> .

For more information concerning the LOOW and NFSS site history, investigations and remediation missions being conducted by the **US Army Corps of Engineers**, visit their site at <http://www.lrb.usace.army.mil/missions/Missions.html> .
